Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A cartridge for insertion into a digital printing device, said cartridge including:
 - a casing having a first portion for housing a supply of cut sheet print media;
 - a print media exit opening arranged in said first portion of the casing; and
 - a pickup roller assembly including:
 - a drive shaft;
 - one or more pick up rollers disposed on the drive shaft for rotation therewith;
 - drive shaft and one or more rollers being captively supported within said first portion of the casing; and
 - a drive gear for rotating the drive shaft;
 - the pickup roller assembly being arranged at least partially within said first portion of the casing and being configured, in use, to pick up and drive a sheet of said print media through said exit opening.
2. (Cancelled).
3. (Currently Amended) A cartridge according to claim 1, wherein said casing further includes a second portion for housing a supply of ink. ~~pickup roller assembly includes:~~
 - ~~a drive shaft;~~
 - ~~one or more pick up rollers disposed on the drive shaft for rotation therewith, drive shaft and~~
 - ~~one or more rollers being captively supported within said first portion of the casing; and~~
 - ~~a drive gear for rotating the drive shaft.~~
4. (Original) A cartridge according to claim 3, wherein said drive gear extends at least partially outside the casing, and is configured to engage a corresponding powered gear provided in the printing device with which the cartridge is to be used.
5. (Original) A cartridge according to claim 4 wherein the drive gear is configured to engage the powered gear provided on the printing device by means of an aperture provided in said casing.

6. (Original) A cartridge according to claim 1, wherein the second portion of the casing is segregated into a plurality of distinct chambers for storing a plurality of different inks.

7. (Previously Presented) A cartridge according to claim 6, wherein each of said ink storage chambers has a corresponding ink outlet that, prior to the cartridge's first use, is closed by a pierceable seal.

8. (Previously Presented) A cartridge device according to claim 7, wherein each ink outlet is in the form of a nozzle adapted to connect with a corresponding ink connection means provided on the printer device with which the cartridge is to be used.

9. (Original) A cartridge according to claim 1, wherein the ink storage portion is defined at least in part by a collapsible membrane.

10. (Original) A cartridge according to claim 1, wherein the casing includes a first print media storage molding, a second ink storage molding and an intermediate molding that serves to complete and enclose said print media and ink storage moldings, whilst simultaneously interconnecting the two.

11. (Cancelled).

12. (Cancelled).
